

```
// d'Après www.ibm.com
```

Voici un exemple de code SANS JQuery:

```
var external_links = document.getElementById('external_links');
var links = external_links.getElementsByTagName('a');
for (var i=0;i < links.length;i++) {
    var link = links.item(i);
    link.onclick = function() {
        return confirm('You are going to visit: ' + this.href);
    };
}
```

Le même AVEC JQuery:

```
$('#external_links a').click(function() {
    return confirm('You are going to visit: ' + this.href);
});
```
